Patriot Scientific Announces GNU-C/C++ Compiler Software for IGNITE-Based Embedded Processor Applications

Thursday February 3, 9:13 am ET

SAN DIEGO, Feb. 3 /PRNewswire-FirstCall/ -- Patriot Scientific Corporation (OTC Bulletin Board: PTSC - News) announced today that it has completed a major upgrade to its development tools including a GNU-C/C++ optimizing compiler for use with its IGNITE family of processor cores.

PTSC provides its own C-based development tools and now offers a bundled GNU-based compiler solution based on Sun's migration suite resulting in higher performance IGNITE-based systems. PTSC provides the highest-performance density microprocessor (measured in Consumermarks) as rated by the Embedded Microprocessor Benchmark Consortium (EEMBC), the industry's standard of benchmarking processor performance. The IGNITE processor core is ideally suited to consumer, digital signal and image processing applications. PTSC will provide these upgraded tools as the standard development environment for new IGNITE customers.

Dr. Patrick Nunally, chief technology officer of Patriot Scientific, said, "This new release allows developers to build code targeted for the GNU-C/C++ compiler, such as Linux. This significant capability, along with the recent EEMBC substantiation, represents a tremendous validation of our processor architecture and compiler technology."

About Patriot Scientific

Patriot Scientific is an intellectual property company, developing and marketing innovative and proprietary semiconductor technologies into the fast- growing handheld wireless and smart card markets. The company's portfolio of patents encompasses what is believed to be fundamental microprocessor technology and includes additional patents pending to protect its technology and architecture.
